

TERMS AND CONDITIONS

Mad Kitty® — Agentic Trader AI, in partnership with N3XTLV LLC

Last updated: 2026-07-20

1. Acceptance of Terms

By registering for, accessing, or using the Agentic Trader AI dashboard, Telegram signals channel, or any related service (collectively, the "Service"), operated by Mad Kitty® ("we", "us", "our"), you ("you", "the User", "the Customer") agree to be bound by these Terms and Conditions ("Terms"). If you do not agree to these Terms, do not register for or use the Service.

You must affirmatively accept these Terms during registration before an account is created. Continued use of the Service after any update to these Terms constitutes acceptance of the updated Terms.

2. Description of Service

The Service provides algorithmic, technical-analysis-based trading signals for cryptocurrency, equity, and commodity markets, delivered either via a private Telegram channel ("Signals") or a web-based dashboard capable of fully automated trade execution on your own exchange account ("Quantum Dash").

The Service is a technical decision-support and/or automation tool. It is NOT:

- Financial, investment, tax, or legal advice of any kind.
- A guarantee, prediction, or assurance of profit, or of avoiding loss.
- A licensed investment advisor, broker-dealer, or financial institution.
- A custodian of your funds, in any capacity, at any time.

All trading signals are generated from historical and real-time technical market data using a defined, rules-based methodology. The specific factors currently considered (and explicitly NOT considered) by this methodology are documented in full, in plain English, within the dashboard's own README section, and are subject to change as the system is improved over time.

3. No Custody of Funds

The Service never takes custody, control, or withdrawal access over your funds at any time. All trading activity occurs directly on your own account with the relevant third-party exchange (currently Weex and/or Blofin). Any API key you provide to the Service must be configured, by you, with trading permissions only — withdrawal permissions must never be enabled on any API key provided to the Service. We are not responsible for any loss resulting from your own misconfiguration of API key permissions.

4. Risk Disclosure

TRADING INVOLVES REAL, SUBSTANTIAL RISK OF LOSS

Leveraged trading, including but not limited to the leverage levels used by this Service, carries a high level of risk and may not be suitable for all users. Losses can, and sometimes will, exceed your initial deposit. Past performance of any signal, strategy, or the Service as a whole is not indicative of future results. You should not use this Service with funds you cannot afford to lose entirely.

You acknowledge and accept that:

- All trading decisions ultimately remain your own responsibility, whether executed manually or automatically by the Service on your behalf.
- Market conditions can change suddenly and unpredictably in ways no system can fully anticipate.
- The Service's signal methodology has known, explicitly-documented gaps (see the dashboard's own README) and is under continuous, ongoing development — it is not, and does not claim to be, complete or infallible.
- Technical failures, connectivity issues, exchange outages, or third-party API changes may prevent signals from being generated or executed as intended, and we are not liable for any resulting loss.

5. Your Obligations as a User

You agree to:

- NEVER manually open, close, or modify a position directly on your exchange's own app or website while using the automated Quantum Dash service. All position changes must go through the dashboard. Manually interfering directly on the exchange desynchronizes the Service's own tracking from reality and can cause the Service to behave unpredictably. If this happens accidentally, you must contact support immediately rather than attempting to correct it yourself.
- Keep your API keys, passwords, and 2FA credentials secure and confidential at all times.
- If using a Blofin-connected (demo-side) account, ensure our server's IP address is correctly whitelisted on your own Blofin API key — Blofin automatically expires any API key without this configuration after 90 days, and we are not responsible for any service interruption resulting from your own account's expired or misconfigured API key.
- Provide accurate registration information, including a valid, monitored email address.
- Use the Service only for lawful purposes and in compliance with all applicable laws and regulations in your jurisdiction, including any local restrictions on leveraged or derivative trading.
- Not attempt to reverse-engineer, exploit, or interfere with the Service's underlying systems or infrastructure.

6. Subscriptions, Billing, and Renewal

The Service offers two, separate paid products: the Signals channel and the Quantum Dash. Current pricing is displayed at the point of registration and may change with notice. Subscriptions renew based on the pricing and terms in effect at the time of renewal, using your account's established renewal rate where a discount or promotional rate has been applied.

Subscription expiry blocks access to the dashboard or signals channel only. It never affects, modifies, or interferes with your own exchange account, your own funds, or any position already open on your own exchange account at the time of expiry.

7. Free Trials

Free trial periods, where offered, are limited to one trial per eligible customer (as determined by email address for the dashboard, or Telegram account for the Signals channel) and may be modified, limited, or discontinued at our discretion at any time, including for accounts already using a trial.

8. Account Suspension and Termination

We reserve the right to suspend or terminate any account, at our discretion, for violation of these Terms, suspected fraudulent activity, non-payment, or any other reason we deem necessary to protect the integrity of the Service or its users. You may cancel your own subscription at any time; no refund is guaranteed for any unused portion of a subscription period except where required by applicable law.

9. Limitation of Liability

To the maximum extent permitted by applicable law, Mad Kitty® and its operators, developers, and affiliates shall not be liable for any direct, indirect, incidental, consequential, special, or punitive damages, including but not limited to trading losses, loss of profits, or loss of data, arising from your use of, or inability to use, the Service — regardless of whether such liability arises from contract, tort, negligence, or any other legal theory, and even if advised of the possibility of such damages.

Nothing in these Terms is intended to exclude or limit liability that cannot be excluded or limited under applicable law.

10. No Warranty

The Service is provided "as is" and "as available", without warranty of any kind, express or implied, including but not limited to warranties of merchantability, fitness for a particular purpose, accuracy, or non-infringement. We do not warrant that the Service will be uninterrupted, error-free, or free of technical issues.

11. Indemnification

You agree to indemnify and hold harmless Mad Kitty® and its operators from any claims, damages, losses, or expenses (including reasonable legal fees) arising from your use of the Service, your violation of these Terms, or your violation of any applicable law or third-party right.

12. Changes to These Terms

We may update these Terms from time to time. Material changes will be communicated via email or an in-dashboard notice where practical. Continued use of the Service after any change constitutes your acceptance of the revised Terms.

13. Governing Law and Dispute Resolution

Governing Law

This Agreement shall be governed by and construed in accordance with the laws of Latvia, without giving effect to any choice of law principles.

Dispute Resolution

Any controversy, claim, or dispute arising out of or relating to this Agreement, or the breach thereof, shall be settled by binding arbitration jointly and mandatorily administered together by all of the following arbitral institutions: the LCCI Court of Arbitration, the Riga Arbitration Court, and the Riga International Arbitration Court, each in accordance with its own respective rules. The place of arbitration shall be Riga, Latvia.

14. Contact

Questions about these Terms, or about the Service generally, should be directed to madkitty.ai@gmail.com.

By checking the box below and completing registration, you confirm that you have read, understood, and agree to be bound by these Terms and Conditions in full, including the risk disclosures in Section 4.
